Weekly Workout

Week of October 19 – October 25, 2026

Theme: Volume build

Volume Build — Squats, Hinges, and a New Finisher

Week 2 of the fall block turns the effort up one notch: same seven days as ever, one more rep on the main lifts, and a brand-new Friday finisher. Every lift still has a barbell and a dumbbell path — pick your lane and log what you actually did.

COACH NOTES

– Week 1 set your baselines; this week adds reps at the same loads. Only add weight when every set of a lift finishes with two clean reps in reserve.
– The new Friday finisher caps out at eight minutes. It should feel like hard cardio, not a second lifting session.
– If Wednesday's deadlifts felt heavy last week, keep the same weight and earn the extra rep before reaching for another plate.
